HG E2000

HIGH SWIVEL TIP

100% electric dumpers

100% electric 2-ton dumper with up to 20 hours of working time on a single charge.

The world's most energy-efficient dumper makes it easy for contractors to operate emission-free machines on site.
It is designed for professionals who want a safer, cleaner, and quieter working environment without compromising productivity.

Powered by a highly efficient direct e-drive system and a **29 kWh lithium battery, the E2000 delivers 3–4 times longer working time than comparable dumpers.** When it's time to recharge, the onboard charger brings the machine back to full power in just 3 hours, wherever you can plug in.

With up to 15% lower total cost of ownership than diesel and up to 90% lower CO_2 emissions, the E2000 helps contractors reduce both operating costs and environmental impact.

E2000 is designed in Denmark and built at our facilities.

Specifications:
L x W x H: 3975 x 1480 x 2989 mm
Weight: 2.700 kg
Volume: 892 / 1205 L
Payload kg: 2.000 kg
Unloading height: 1720 / 1200 mm

Battery:
Lithium: 29 kWh
Voltage: 48V
Runtime: Up to 20 hours
Automatic heating: Yes

Charger:
On-board charger: 2-10 kW
10 kW charger / 10-80%: 3 hours / **0-100%:** 4 hours
2 kW charger / 10-80%: 10 hours / **0-100%:** 15 hours

HG E2000

Engine:

Type: Electric
Performance: 12 kW (3kW x 4 engines)
Moment: 26 Nm
Travel speed: 0-16 km/h

General function:

Tip: Hydraulic
Swivel: Hydraulic
High Tip: Hydraulic
