

HG E2000

**HIGH
SWIVEL
TIP**

**100% electric
dumpers**

100% electric 2-ton dumper with up to 20 hours of working time on a single charge.

The world's most energy-efficient dumper makes it easy for contractors to operate emission-free machines on site.

It is designed for professionals who want a safer, cleaner, and quieter working environment without compromising productivity.

Powered by a highly efficient direct e-drive system and a **29 kWh lithium battery**, the **E2000 delivers 3–4 times longer working time than comparable dumpers.** When it's time to recharge, the onboard charger brings the machine back to full power in just 3 hours, wherever you can plug in.

With up to 15% lower total cost of ownership than diesel and up to 90% lower CO₂ emissions, the E2000 helps contractors reduce both operating costs and environmental impact.

E2000 is designed in Denmark and built at our facilities.

Specifications:

L x W x H: 3975 x 1480 x 2989 mm
Weight: 2700 kg
Volume: 892 L
Payload kg: 2000 kg
Unloading height: 172/120 cm

Battery:

Lithium: 29 kWh
Voltage: 48V
Runtime: Up to 20 hours
Automatic heating: Yes

Charger:

On-board charger: 2-10 kW
10 kW charger / 10-80%: 3 hours / 0-100%: 4 hours
2 kW charger / 10-80%: 10 hours / 0-100%: 15 hours

HG E2000

Engine:

Type: Electric
Performance: 3 kW x 4 pcs.
Moment: 41Nm - instant
Travel speed: 0-16 km/h

General function:

Tip: Hydraulic
Swivel: Hydraulic
High Tip: Hydraulic
