

HG E3000

**HIGH
SWIVEL
TIP**

**100% electric
dumpers**

100% electric 3-ton dumper with up to 12 working hours on a single charge.

The world's most energy-efficient dumper, making electric the obvious choice. No noise. No emissions. No fuel. No idle costs.

The E3000 is engineered to maximize uptime and productivity. With its highly efficient **direct e-drive system** and **29-kWh lithium battery**, it delivers **2-3 times longer operating time** than comparable dumpers. When it's time to recharge, the **onboard charger** restores full capacity in 3 hours - wherever you plug in.

With up to **20% lower total cost of ownership than diesel dumpers** and **up to 90% lower CO₂ emissions**, the E3000 helps contractors reduce both operating costs and environmental impact.

Electric dumpers define our business. We don't balance the production of diesel and electric dumpers. **Everything we do is focused on delivering the market's leading electric dumper.**

Compact dumpers designed in Denmark since the 1970s.

100% ⚡ Electric

- Up to 12 working hours per charge
- Fast on-board charging in 3 hours
- 29 kWh lithium battery with 5-year warranty
- Automatic battery heating system
- Charge anywhere with 3-phase, Type-2 or 230/110V socket
- 15% lower total cost of ownership vs diesel

Specifications:

L x W x H: 4185 x 1690/1750 x 2825 mm
Weight: 2,800 / 3,100 kg
Volume: 1080 / 1795 L
Payload kg: 3,000 kg
Unloading height: 1150 / 1818 mm

Battery:

Lithium: 29 kWh
Voltage: 48V
Runtime: Up to 12 hours
Automatic heating: Yes

Charger:

On-board charger: 2 & 10 kW
10 kW charger / 10-80%: 3 hours / 0-100%: 4 hours
2 kW charger / 10-80%: 10 hours / 0-100%: 15 hours

HG E3000

Engine:

Type: Electric
Performance: 12 kW (3kW x 4 engines)
Moment: 26 Nm
Travel speed: 0-16 km/h

General function:

Tip: Hydraulic
Swivel: Hydraulic
High Tip: Hydraulic
